

# FALL PLANNING FOR 2024

## REDUCE SOIL SAMPLING COSTS BY 65%

Only soil test for Nitrogen.  
Let Paradigm do the rest.

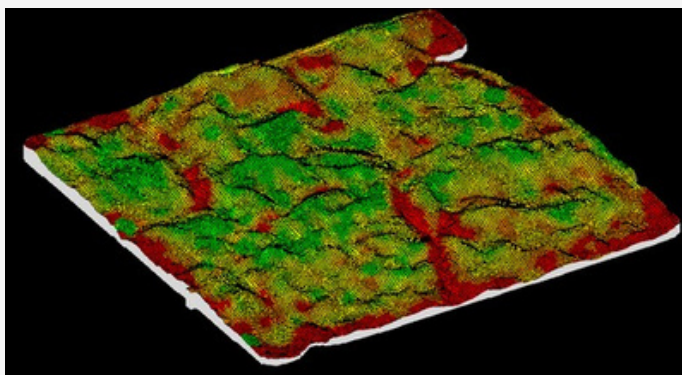

**\$2/ACRE**

### THE LOGIC

With just a few years of existing farm data, we can model P, K, and S more accurately than a yearly soil test and identify areas where N is being lost.

### WHAT'S INCLUDED

- All yield data cleaning and repair
- Profit maps
- Digital elevation model
- Nutrient efficiency maps for N, P, K, S
- 3, 5, and 7 zone maps for each nutrient
- A visit from a Dark Horse Ag team member
